Registered Name: Active Asics Amy

Call Name: Amy

Breed: Nova Scotia Duck Tolling Retriever
Date of Birth: May 12, 2016
Gender: Female

Optigen Accession #: 18-1753

Test Performed: prcd Mutation Test for PRA

Sample Type: Swab

Test Results: Genotype of your dog is NORMAL/CLEAR.
Risk for developing prcd-PRA: This dog will never develop the prcd form of PRA (progressive rod-cone degeneration form of Progressive Retinal Atrophy). prcd-PRA is the most prevalent form of PRA in most breeds of dog but there are other forms of PRA that could occur in any breed. DNA testing does not replace the value of routine eye exams. Significance for breeding: Genetically Normal/Clear dogs can be bred to any dog and will produce no pups affected with the prcd form of PRA.

This interpretation is based on the test result of the DNA test for the specific mutation identified as causing the prcd form of PRA in Nova Scotia Duck Tolling Retrievers as of the date on this report.
